

Are You Saving the Right Stuff?

A Saving Strategy

Use the chart below to plan and evaluate a strategy for backing up your system. Developing a save strategy allows you to recover information when it becomes necessary. Your business may depend on your ability to recover. To ensure you have a good backup strategy, test your recovery strategy at IBM Business Recovery Services. Call 1-800-559-9950 or visit <http://www.brs.ibm.com> for more information.

A Saving Decision

In making decisions about your strategy for saving and data availability, you need to balance the cost of a failure with the cost of protection against a failure.

To decide how much time, effort and money a save strategy will entail, you must ask yourself a few practical questions:

- How will your business be impacted when the system is unavailable while a backup is performed?
- What is the cost of being without the system during an unplanned outage?
- How much data can you afford to lose?

Backup Recovery and Media Services for AS/400
